### IMPORTANT NOTES

There may be variations in depth and colour of Paving due to the manufacturing process, it is recommended that you mix pallets where possible to ensure an even toning. We can recommend installers familiar with our products if a full install is preferred.

When wrapped for storage sweating may occur, this will reduce when exposed to the air.

We recommend sealing our pavers to protect your investment and enhance the appearance. Dale Stone retail various sealers and can recommend one depending on the final finish you would like with a choice of water or solvent based.

Recycled products may contain some element of wood and paper.
